CITY OF SPRINGFIELD

Nixle Update No. 8

2021-2022 T.H. 14 and Central Street Improvements

Springfield, Minnesota

June 7th, 2021

General Updates:

- A water main shut down is required to make the connection to east of O'Connell.
  - The duration of the shutdown should only be a couple hours and is scheduled for 8:30am on Tuesday, June 8th.
  - **Impacts will be brief and limited to the downtown block of Marshall Street to O'Connell Avenue and Spring Street to Park Avenue.**
  - The shutdown is dependent on a passing water main bacteria test. If the test results are favorable, the shutdown will continue as scheduled, otherwise the shutdown will need to be rescheduled.

- Temporary water services will be switched over from Spring Street to Park Avenue beginning June 8th. The Contractor may need to get inside homes to shut down meters on this block.

- Removals to begin from Spring Street to the intersection of Park Avenue.

- A second water main shutdown for the block between Spring and Park is scheduled for Wednesday, June 9th. The second shut down is required to cap the water main east of Park Avenue.

- Water main construction is scheduled to continue between Spring Avenue to Park Avenue after removals are completed.

For the most up-to-date information and construction notices. Text "CENTRAL2020" to 888777 to sign up for Nixle Alerts.
